

Prognosis

1. Dila 's anxiety, which was already debilitating, has become worse since her injury, is currently stable and is now unlikely to improve further, particularly now that she is living with chronic pain.
2. Due to permanent nerve and muscle damage Dila 's pain is now unlikely to further improve, is currently stable, and she will now have ongoing, permanent pain in her left leg.

Outcome

Due to ongoing severe anxiety and chronic pain Dila is unfit for any employment now and into the foreseeable future.

I trust this report is of benefit.

A handwritten signature in black ink, appearing to read "M. Moore". The signature is fluid and cursive, with a long horizontal stroke at the end.

Dr. Michael Moore
