Re: Application for Patient Information
Patient Name: Dila Melek Demir
DOB: 21/01/1993

Dear Dila

Please find enclosed copies of the clinical notes from Royal Prince Alfred Hospital as requested on [DATE]. The following clinical notes have been provided:

- RPAH Discharge Summary (07/05/2025 – 12/05/2025)

Your request has been processed in accordance with the Health Records and Information Privacy Act 2002.

Please note that correspondence from other health care facilities may exist in your medical record but is not routinely released as it is considered third party information. We would ask that you request any third party information directly from the external agency.

SLHD uses a hybrid (paper and electronic) medical record system. You have been provided a photocopy of your paper medical record. The electronic medical record (eMR) has been generated using the built-in "print as PDF" functionality of the eMR system. This print functionality is the only one available and cannot be changed. This automated print function was programmed to sort by document type (e.g. medical notes, nursing notes). As a result, your medical record will not appear in chronological date order. Some clinical notes may not be signed off by the clinician. The status of the clinical notes is current at the time of printing.

Please contact the Medicolegal Department via (02) 9515 6088 if you require any further information.

Yours sincerely,

Shreya Vallam

Summary of Care

Dear Colleague,

Thank you for reviewing Ms Dila Demir, a 32-year-old female to be discharged on 12/05/2025 from High Dependency Unit at Professor Marie Bashir Centre at Royal Prince Alfred Hospital. Dila presented to this facility on 08/05/2025 with symptoms consistent with agoraphobia with panic attacks, chronic depression, dependent personality traits and ?avoidant personality disorder. Dila was admitted under the Mental Health Act and was discharged following stabilisation of mental state. Please see below for discharge plan and a detailed summary of this admission.

Background

Dila is a 32-year-old woman living with her partner Zoe in Leichhardt. She is unemployed, receiving job seeker through Centrelink. There is a significant history of childhood trauma. She has limited social supports, not in contact with her family. Dila has a background of depression and anxiety. She is under D& A service in Lanton centre for monthly Buvidal injections (previous use of methamphetamine, GHB, cocaine). She has previously been incarcerated for a kidnapping charge.

Presenting complaint

Dila was brought to ED following concerns raised by her partner to the mental health line relating to depression with increasing level of anxiety, self-neglect, feeling fearful to leave the house, has not been eating or drinking for 3 days, expressing suicidal ideation with plan to starve to death and feels self is dead already. On the initial assessment, Dila presented as irritable with ambivalence around suicidal ideation. She was then admitted to the ward under the Mental Health Act.

Attendance Date: 07/05/2025

Discharge Date: 12/05/2025

Summaries and Reports

Nil significant

Medications prior to presentation

Buvidal Monthly, 160 mg, Subcut, Inj, depot, q4 wk

Progress during admission

Dila was admitted to High Dependency Unit at Professor Marie Bashir Centre. She was made a voluntary patient after the initial review. She was commenced on venlafaxine 37.5mg OD on admission then changed to mirtazapine 30mg OD though she preferred venlafaxine. Dila requested for discharge shortly after the admission due to highly stimulating ward environment and her partner was supportive of the same. She was calm, euthymic and future focussed approaching discharge and she remained pleasant, polite and engaging on the ward. She was eating and drinking well and there were no active risks to self or others at time of discharge. Dila planned to self refer to The Way Back for additional mental health support and was referred to ACS for follow up prior to discharge.

Medications on discharge

Buvidal Monthly, 160 mg, Subcut, Inj, depot, q4 wk

Venlafaxine MR 37.5mg OD PO

PRN diazepam 5mg OD PO
